PROFESSIONAL SUMMARY

Senior Mobile & Frontend Engineer with 7+ years of experience building and maintaining production mobile applications for iOS and Android using React Native, TypeScript, and JavaScript. Experienced in social platforms, education, real-time communication, location-based services, media processing, and subscription-based applications.
Strong background in frontend architecture, state management, API integration, performance optimization, reusable UI components, and native mobile integrations. Familiar with React web development and have practical experience with C#, ASP.NET Core, MySQL, and Docker through backend development and application projects.
Experienced in AI-assisted software development, using coding agents for implementation, refactoring, debugging, testing, code review, and documentation, with a focus on maintainable architecture and code quality.

TECHNICAL SKILLS

Mobile Development: React Native, TypeScript, JavaScript, React Native New Architecture, JSI, TurboModules, Native Modules, Kotlin, Jetpack Compose

Frontend Development: React, Vite, React Router, Tailwind CSS, shadcn/ui, HTML, CSS, Responsive Design

State Management & Data Fetching: Redux Toolkit, Redux-Saga, Zustand, Valtio, TanStack Query, React Query

Backend & Databases: C#, ASP.NET Core, REST APIs, GraphQL, MySQL, SQL fundamentals

DevOps & Development Tools: Docker, Docker Compose, Git, GitHub, Android Studio, Xcode

Real-Time & Integrations: SignalR, Socket.IO, WebRTC, Firebase, Push Notifications, Deep Linking, In-App Purchases, Subscriptions

Performance & Architecture: Performance Optimization, Rendering Optimization, Lazy Loading, Memoization, FlashList, MMKV, Image Caching, Clean Code, SOLID, OOP, Design Patterns

UI & Media: React Native Reanimated, Lottie, Gesture Handler, SVG, Media Processing, File Handling

AI-Assisted Development: Cursor, AI Coding Agents, Prompt Engineering, Context Engineering, Refactoring, Debugging, Test Generation, Code Review, Documentation

PROFESSIONAL EXPERIENCE

TOGETHING, *Senior React Native Developer* — 01/2025
Developed and maintained a social platform focused on goal setting, positive habits, and user engagement. — Netherlands | Remote | Hourly Contract

- Developed and enhanced mobile features using React Native and TypeScript.
- Worked with GraphQL, React Query, and state management solutions including Redux Toolkit, Zustand, and Valtio.
- Implemented real-time communication and data synchronization using SignalR.
- Maintained in-app purchases and subscription flows for Android and iOS.
- Improved media loading, image caching, and recovery of expired media URLs.
- Investigated production crashes, application startup issues, and performance bottlenecks.
- Collaborated with backend and product teams to deliver new features.
- Used AI coding agents to support implementation, debugging, refactoring, testing, and documentation.

Apsy, *React Native Developer (Remote)* — 10/2021 – 10/2026
Worked on multiple mobile applications across education, communication, social interaction, and interactive user experiences. — California, USA

- Developed and maintained large-scale React Native applications for iOS and Android.
- Refactored existing codebases to improve stability, maintainability, and application performance.
- Built reusable UI components based on custom design specifications.
- Integrated REST and GraphQL APIs and implemented client-side data management.
- Worked with JavaScript-to-native communication and native mobile integrations.
- Optimized rendering, application startup, and resource consumption.
- Contributed to technical reviews, architecture decisions, and debugging.
- Supported junior developers and collaborated with backend, design, and product teams.
- Used AI-assisted development tools for implementation, code analysis, debugging, and documentation.

Improver Digital, *React Native Developer (Remote)* 03/2021 – 10/2021
Istanbul, Turkey

- Developed cross-platform mobile applications using React Native, JavaScript, and TypeScript.
- Built reusable frontend components and integrated REST APIs.
- Implemented state management with Redux and Redux-Saga.
- Developed video calling functionality for dating applications using WebRTC.
- Implemented screen-recording protection for supported application flows.
- Worked with Firebase, Socket.IO, and real-time communication features.
- Built interactive user interfaces and animations using mobile UI libraries.

PROJECTS

Togething , *Social & Habit-Building Platform*
React Native | TypeScript | GraphQL | React Query | SignalR | Zustand
Developed and maintained a social platform focused on goal setting, positive habit formation, and community engagement. Worked on real-time synchronization, subscription flows, media caching, API integration, and production performance improvements.

Damdast , *Personal Productivity & Utility App*
React Native | TypeScript | Zustand | MMKV | Reanimated
A multi-purpose mobile application designed around offline-first functionality, performance, and everyday productivity.

- Developed tools for calculations, unit conversion, scanning, reminders, and installment management.
- Implemented work-hour tracking with Excel export.
- Added image, video, and audio compression features.
- Built offline games, timers, countdowns, and stopwatch utilities.
- Implemented Persian and English localization with RTL/LTR support.
- Added themes, application locking, backup/export, and gamification features.
- Published the application on Iranian Android and iOS app marketplaces.

Portfolio , *Web Portfolio*
A responsive personal portfolio presenting professional experience, technical skills, and projects.

- Built reusable UI components and responsive layouts.
- Added project filtering, multilingual support, and dark/light themes.
- Documented project architecture and the role of AI-assisted development.
- Deployed the website on Vercel.

Scanfa , *OCR & Document Scanning App*
Mobile Application | Published Project
A document scanning and text extraction application published on Iranian app marketplaces.

- Developed a practical document-processing application for mobile users.
- Published on SibApp.

NoteApp , *Full-Stack Note Management Web App*
Technologies: C#, ASP.NET Core, React, TypeScript/JavaScript, MySQL
A full-stack web application for creating, managing, and organizing personal notes, built with ASP.NET Core for the backend and React for the frontend.

- Developed backend functionality using C# and ASP.NET Core to support note management.
- Built a responsive and user-friendly web interface with React.
- Integrated the React frontend with backend APIs for data communication.
- Applied separation of concerns between the frontend and backend to maintain a clean and maintainable codebase.
- Practiced full-stack development, API integration, and database-driven application design.

Compressa, *Compressa — Android Media Compression App*
Kotlin | Jetpack Compose | MediaCodec
A native Android application focused on image and video compression.

- Built the user interface with Jetpack Compose.
- Worked with Android media APIs and MediaCodec for media processing.
- Implemented background processing with foreground services.
- Focused on compression quality, processing reliability, and user experience.

ShopSphere , *Full-Stack E-commerce Platform*
Technologies: React, TypeScript, ASP.NET Core, C#, REST APIs, MySQL
A full-stack e-commerce platform designed to provide a smooth online shopping experience, with a React-based frontend and an ASP.NET Core backend.

- Built a responsive shopping interface using React and TypeScript.
- Developed backend services using C# and ASP.NET Core.
- Integrated frontend components with REST APIs for product and application data.
- Focused on maintainable architecture, reusable components, and clear separation between frontend and backend.
- Used AI-assisted development tools to accelerate implementation, debugging, refactoring, and documentation.

Common Time , *Education Music* 03/2022 – present
Education music between Artist and Students with Online class and chat

MVP: Most Valuable Professional , *Public Job Offers* 01/2022 – present
Take daily quizzes and search for your favorite job. If you succeed in each quiz, you can get a badge for each skill. And you can upload your resume in this application and search for your favorite job with our offers

Alba Education , *Education for online school* 03/2021 – 07/2021
Education between student and teacher

BitcoinBachelors , *Dating application* 01/2022 – 04/2022
A Place for Bachelors and Bachelorettes Who Own Bitcoin to Date and Mingle

Drive & Detours , *Drive and Record route* 05/2021 – 03/2022
user can drive with car and record routes

ToDo App 03/2023 – present
ToDo List App is a kind of app that generally used to maintain our day-to-day tasks or list everything that we have to do.

Volex 07/2021 – 10/2021
Digital currency application. Buy and sell digital currencies

Wingle, *Dating* 01/2021 – 01/2022
Dating Application with video and chat

EDUCATION

Bachelor of Computer Engineering, *Semnan university* 09/2015 – 09/2020
semnan, iran
